

TOWARDS A COSMIC CITIZENSHIP

The background of the slide is a composite image. The upper portion shows a view of the Earth from space, with the blue and white horizon of the planet curving across the frame. Below the horizon, a dense crowd of people is visible in silhouette, looking upwards and holding up cameras or smartphones to capture the view. The scene is set against a dark, star-filled sky.

2014-2017

2017-2018?

Our philosophy:

Communicate science through emotion

Planetarium mission:

*Share the knowledge of the sky with everybody to enjoy
the beauty of the universe and raise an awareness of
our cosmic citizenship.*

A large, detailed image of the Moon's surface, showing numerous craters and lunar features. A silhouette of a hand is visible, pointing towards the Moon, suggesting a connection between human observation and the celestial body.

Social inclusion:

- Education projects pairing schools from the city center with suburban schools, planetarium shows for hearing and speech impaired people and other disabilities, education projects for jailed people, events on intercultural astronomy (i.e. migrants “Under the Same Sky”, “Space Metropolis”)
- Star Parties, free public observing events, free astronomy lectures, engagement via social networks
